(a) Refer to footnote (a) in Table 1.1.

(b) The decreases in July and September 2017 reflected withdrawals of transferable deposits by Other Depository Corporations, while the increases reflected placements.

(c) Begining of August 2009, the IMF SDR allocations were reclassified as foreign liabilities and not as 'shares and other equity' consistent with the methodology in the System of National Accounts (SNA) 2008 and the Balance of Payments Manual, 6th edition (BPM 6). The IMF member countries pay interest on the SDR allocations and therefore are considered as debt holdings and not equity. Historical data were revised accordingly.

(d) From January 2002, gold holdings are valued at market price.

(e) From January 2002, Treasury bills were revised and reported at discount values. Treasury bills bought from the Government and sold under the BPNG TAP facility, since August 2012. As of 26th September 2014, it includes Treasury bills acquired from under-subscription or rejection at the auction.
