

The SEACEN Centre

Learning and Research Needs Survey

Macroeconomic and Monetary Policy Management (MMPM)

Meeting of SEACEN Directors of Research and
Training

Alotau, Papua New Guinea

August 19, 2016

Brief explanation

- “ Potential courses included in the evaluation : 16
- “ 16 Respondents
- “ The next slide describes the results pertaining to courses
- “ Slide 4 interprets the results by identifying what appears to be priority courses and what are potential additional courses
- “ From slide 5 onwards, the results related to the preferred modules within each course are presented

Survey results for each of the 16 potential courses

Please indicate the priority this course should take in SEACEN's course offering during 2017

Interpretation of the results: ↑ = priority courses, ↑ = potential additions

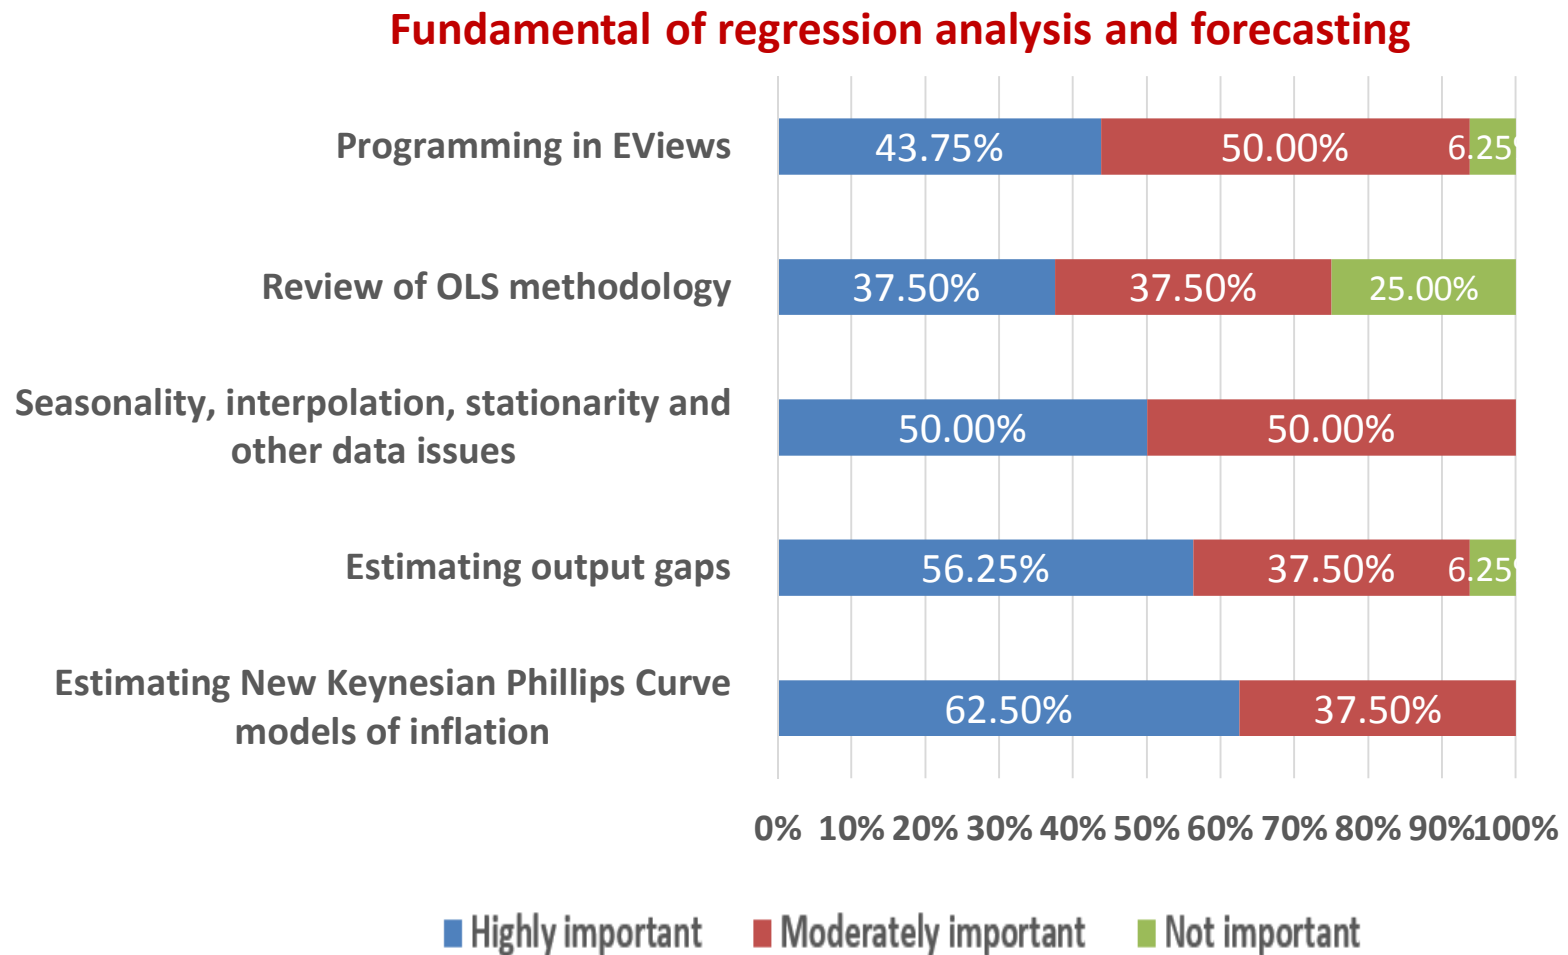

Most important modules

Econometrics Modelling & Forecasting

- “ Fundamental of regression analysis and forecasting
- “ Intermediate course on modelling and forecasting technique
- “ Advanced topics in modelling and forecasting techniques

The most important modules:

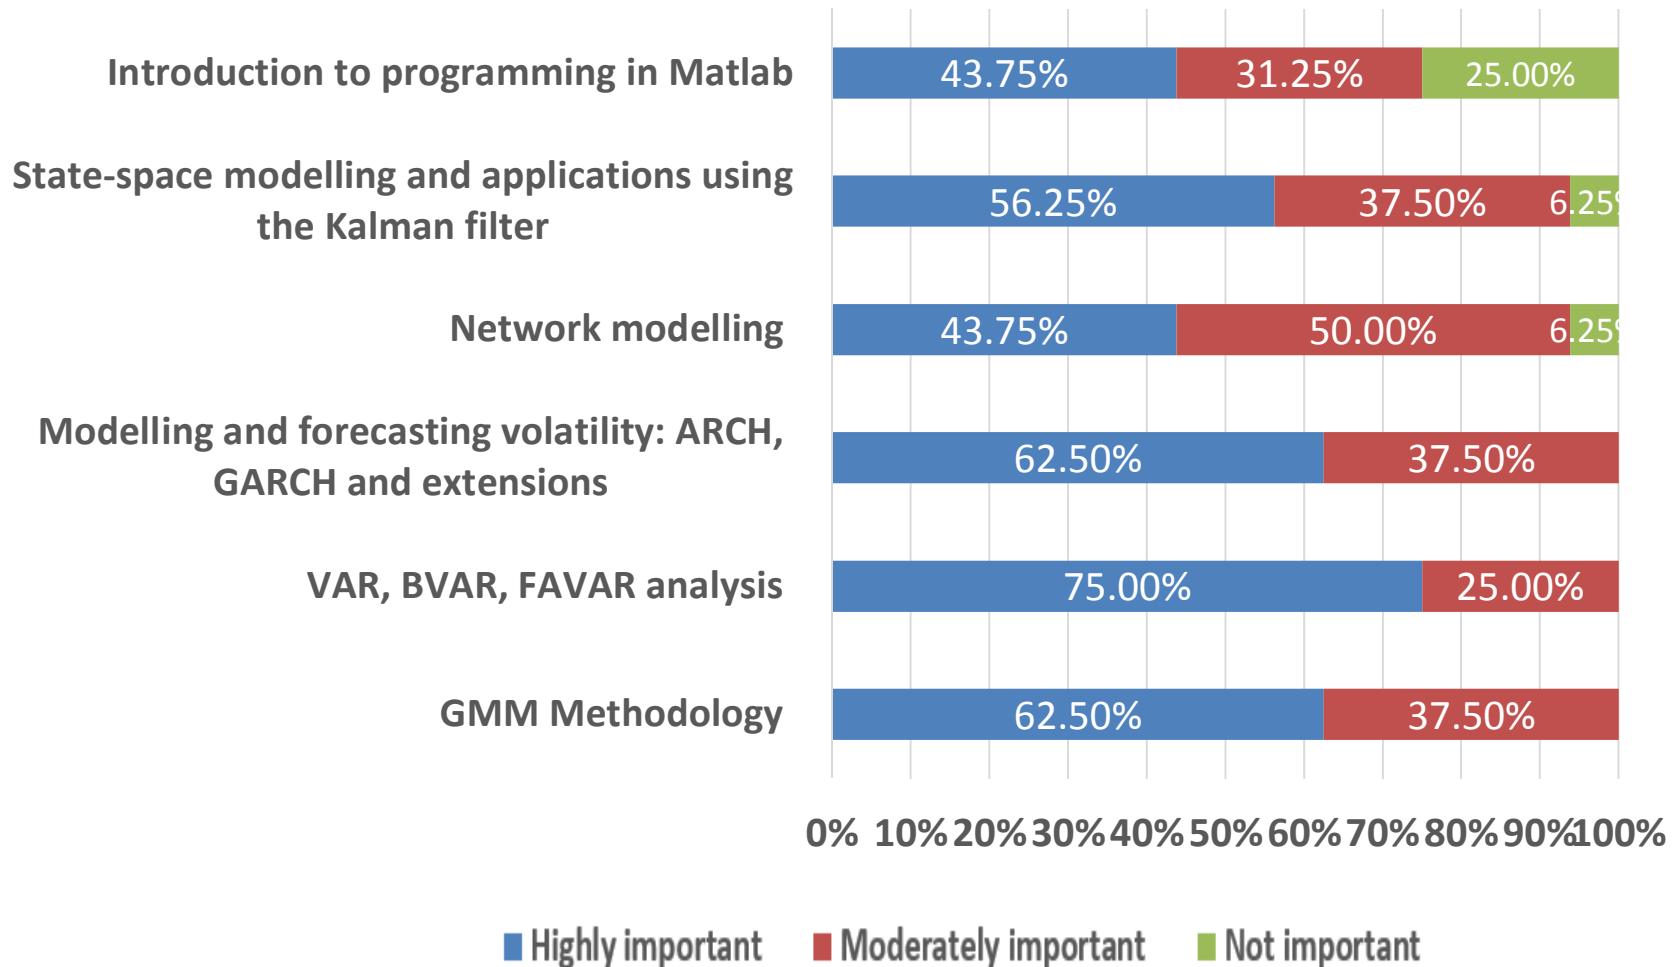

If this course is given in 2017 what importance should the following topics be included in the course program?

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

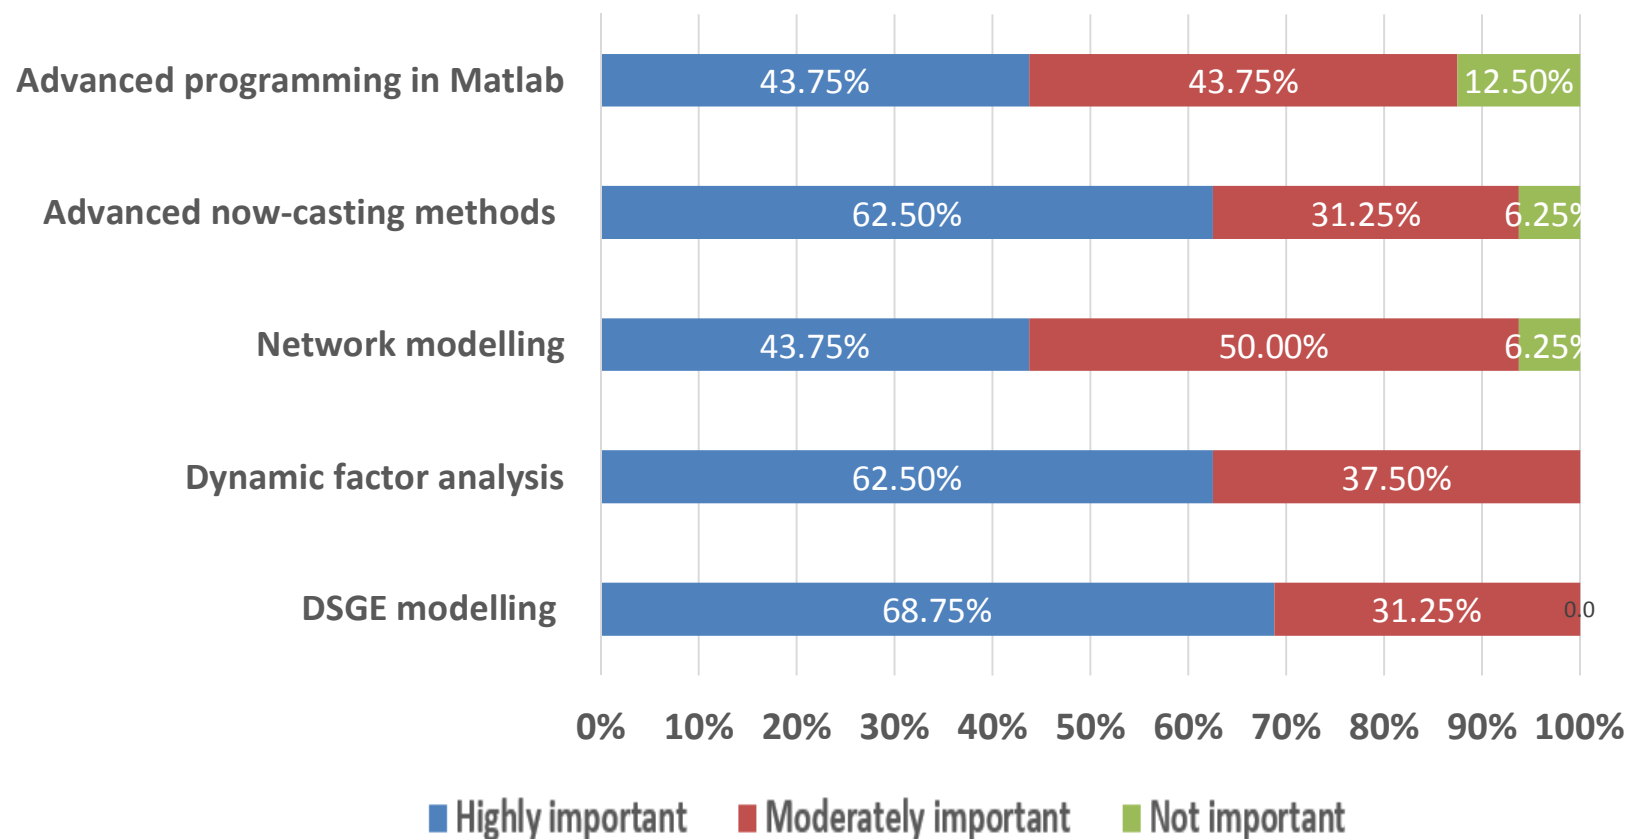

Intermediate course on modelling and forecasting technique

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Advanced topics in modelling and forecasting techniques

Most important modules

MP Management

“ The analytics of Macroeconomic and Monetary Policy Management

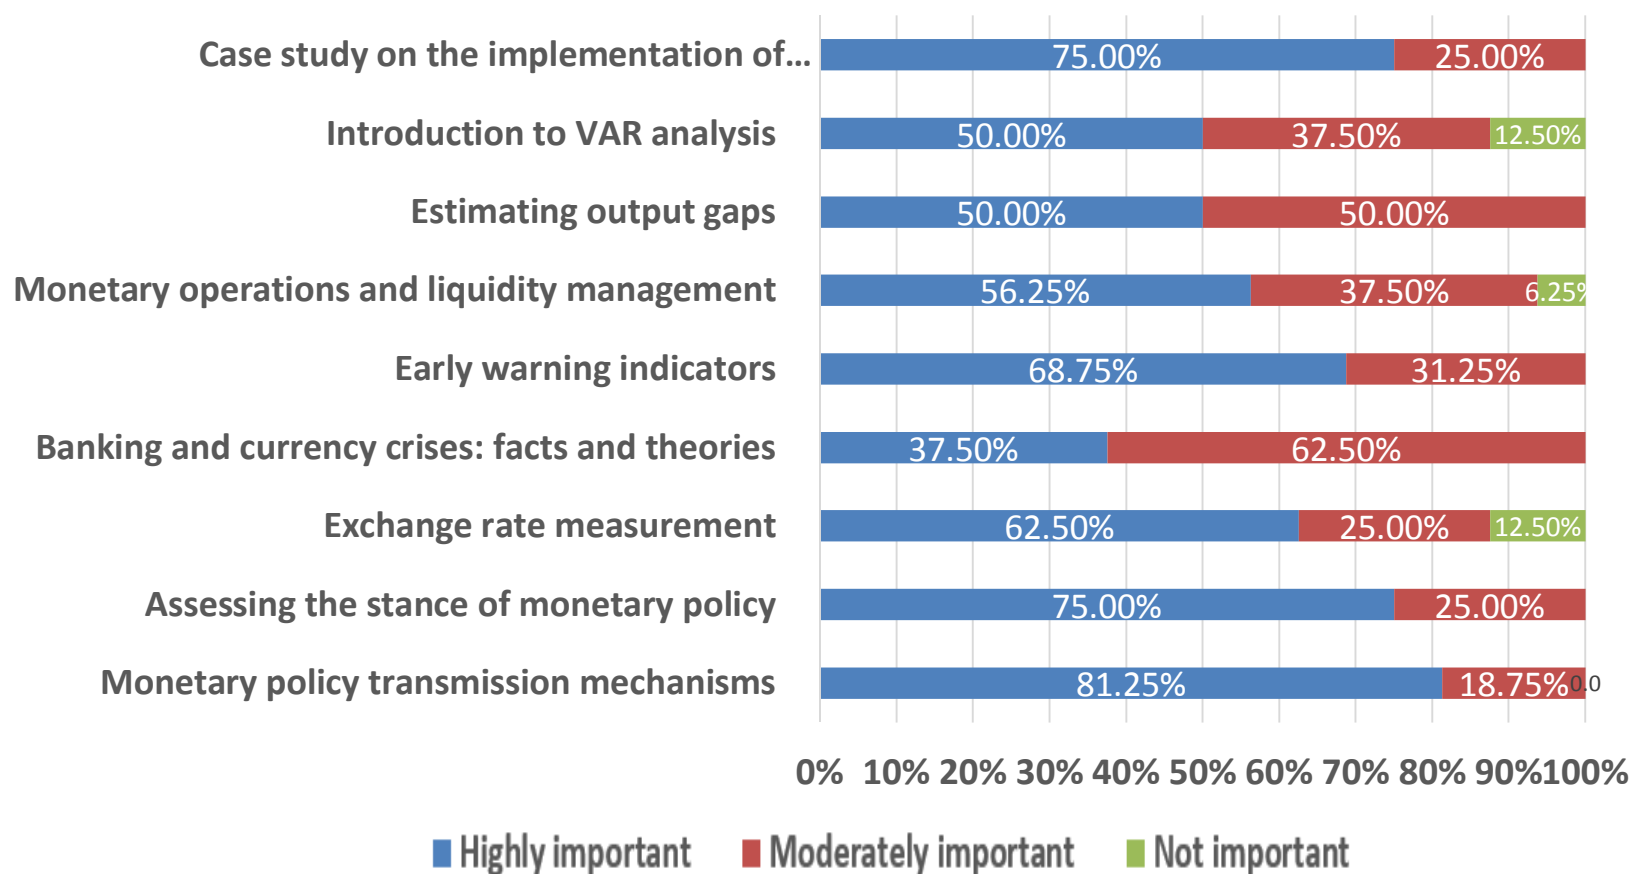

“ Monetary policy transmission

“ Monetary policy strategies - Monetary Operations

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

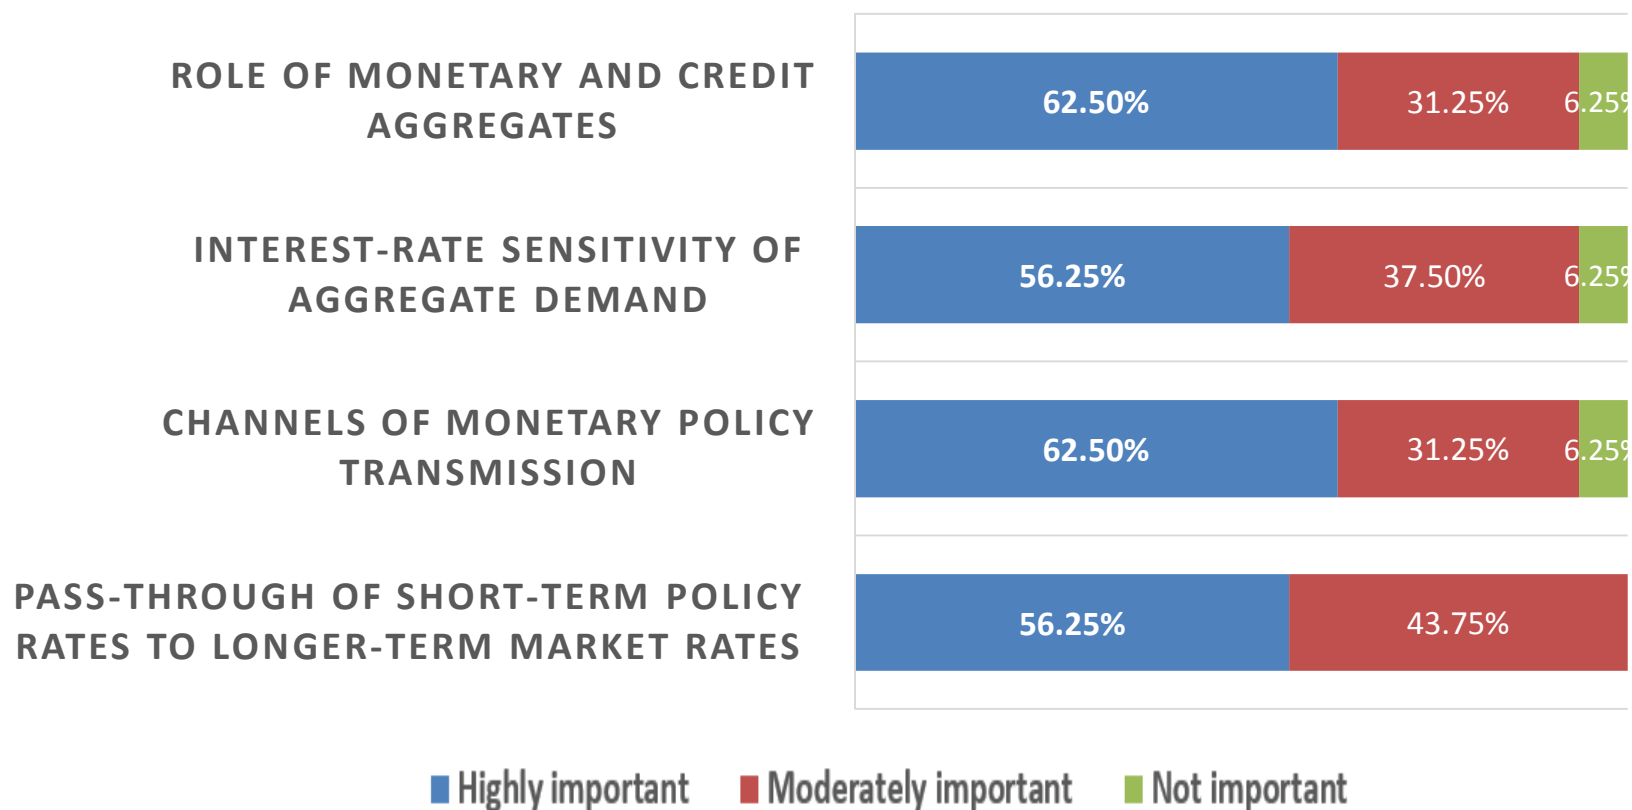

The analytics of Macroeconomic and Monetary Policy Management

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Monetary Policy Transmission

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Monetary Policy Strategies

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Most Important Modules

Financial Markets

- “ Introductory course on extracting information from financial markets for monetary policy management
- “ Advanced Course on extracting information from financial markets
- “ Financial market development

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Introductory course on extracting information from financial markets for monetary policy management

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Advanced Course on extracting information from financial markets

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Financial market development

Most Important Modules

External Sector

- “ Balance of Payments and IIP Measurement
- “ External Sector Analysis

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Balance of Payments and IIP Measurement

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

External Sector Analysis

The Most Important Modules

Macroeconomic Diagnostics

“ Foundation of macroeconomic diagnostics

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Foundation of macroeconomic diagnostics

The Most Important Modules

Macro-Prudential Linkages

- “ Modelling the interaction of monetary-, financial-, and real sectors in DSGE-type models (Advanced Course)
- “ Financial cycles and crises (Joint with FSS)
- “ Macro-prudential policy (Joint with FSS)

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Modelling the interaction of monetary-, financial-, and real sectors in DSGE-type models (Advanced Course)

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Financial cycles and crises (Joint with FSS)

The most important modules:

If this course is given in 2017 what importance should the following topics be included in the course program?

Macro-prudential policy (Joint with FSS)
